

OptiPoint

This application provides manufacturers with the ability to formulate inventory and supply policies based on sales and consumption data collected from their ERP system, creating a robust approach to achieving inventory balance.

DYNAMIC

Establish your relative priority among supply reliability, lead time, and customer expectations to meet your targets without surplus or inadequate inventory.

INTEGRATIONS

Fully integrates with your existing ERP system to formulate inventory and supply policies that help you achieve inventory balance.

IMCO
SOFTWARE

CONFIGURABLE FORECASTING

Select a custom service level and modify the different selections to see the impact that service level will have on working capital tied up in inventory.
